## PRODUCT MATERIAL LEED INFORMATION

Post Consumer Recycled Content	40%	Post-consumer recycled content is a material that is composed of previously used and recycled materials. Instead of ending its lifecycle as a single-use product or materials, it was redirected away from the landfill, and processed and repurposed for a new use, extending its lifespan and reducing its impact on our environment.
Pre Consumer Recycled Content	0%	Pre-consumer recycling is the reclamation of waste materials that were created during the process of manufacturing or delivering goods prior to their delivery to a consumer.
