

# PRODUCT SUBMITTAL - WALL DEFENDER

The 3GEN Wall Defender is designed for traditional brick masonry cavity-wall construction.

### Material Conformance

Made of a new structural strand polymer mesh, its trapezoidal shape captures mortar droppings on two levels so they can't form a solid dam.

Design lets water flow, unobstructed, to weep holes and promotes significantly greater airflow within the cavity to promote drying.

Provides structural strand polymer mesh (0.4", 1", 1.5", or 2") trapezoidal configuration to maintain airflow and drainage while suspending mortar droppings at unequal heights.

Provides one or more thicknesses as required to fill cavity width. Install per manufacturer's instructions.

### Product Details

Material: Polymer

Size:

- 02-X-0094 - 10" high x 0.4" thick x 5' long material
- 02-X-0095 - 10" high x 1" thick x 5' long material
- 02-X-0096 - 10" high x 1.5" thick x 5' long material
- 02-X-0097 - 10" high x 2" thick x 5' long material
