

# STAINLESS STEEL STONE ANCHORS

## #724 STONE ANCHOR

### Material Conformance:

The 3GEN #724 Stone Anchor is a versatile stone veneer anchoring system designed for attaching random (ashlar) rubble stone veneer to metal stud, concrete masonry unit (CMU), or cast-in-place concrete backup walls.

The system consists of a formed L-bracket with an elongated slot and a continuous J-hook assembly. This design provides structural veneer support while offering installation flexibility to accommodate the natural variations, tolerances, and field alignment requirements typical in random rubble stone construction.

Manufactured from hot-dip galvanized steel or Type 304 stainless steel, the #724 Stone Anchor is engineered for long-term structural performance, corrosion resistance, and durability in exterior wall applications. The system is compatible with a wide range of cavity wall assemblies and meets TMS 402/602 and ACI/ASCE 530 building code requirements.

### Sizes/Finishes:

Hot Dip Galvanized

Stainless Steel Type 304

Insulation Thickness:

0"	1"	1 1/2"	2"	2 1/2"
3"	3 1/2"	4"		

Triangle Length:

3"	4"	5"	6"	7"
----	----	----	----	----

J-Hook x 20" Long:

- 3/8" Diameter
- 7/16" Diameter
- 1/2" Diameter
